

Floating Building

(+) Floating building with large terraces and different living space: home and work. The shapes of these timber frame buildings, brings a pleasant atmosphere and very comfortable.

This building is designed with a high level of self-sufficiency (renewable energy...).

(+) Level of self-sufficiency bespoke on request: waste water treatment plant, electricity generation, wind power, photovoltaic solar, thermal solar, drinking water. Accessible. Floating part (steel, aluminium), concrete floater.

High energy efficiency.
