

Lightweight unit

(+) Traditional wooden canoe

Open touring canoe designed with respect for the heritage of traditions and functional demands, enhanced with innovations and made from the finest materials, handmade.

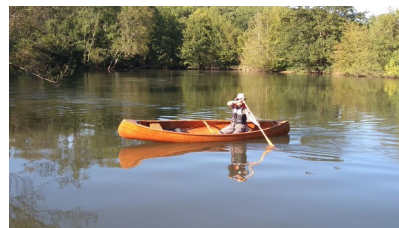

The original beauty of the wood essences and the natural variation of its grain, the respect for the materials, and the meticulous attention given to each step of its construction and finishing make it a high quality product, unique and original, that you will take pleasure to look at.

The combination of the wood and its shapes defines a stylish and elegant canoe that will add style to your adventures and will not leave you indifferent.

This wide, stable and lightweight canoe will offer you, whether solo or in tandem, moments of relaxation on the water, fishing, peaceful paddling on calm waters to discover our exceptional natural areas or even fulfill your dreams of adventure and expedition.

Its curves and features make it responsive and highly maneuverable, ideal for more sporty whitewater navigations.

Easily repairable with minimal maintenance, this robust canoe will accompany generations through enduring moments of freedom.
